

"High-quality planes and accessories featuring today's finest engineering."

AT-6 TEXAN ARF

ALMOST-READY-TO-FLY .60-SIZE WARBIRO

EXPERTLY COVERED WITH
MONOKOTE

Fly with the Greatest Generation

Ready for a warbird? Then you're ready for this Top Flite ARF — and to join, R/C style, with the heroic WWII pilots who earned their wings in the Texan military trainer. From its authentic trim scheme to the scale cockpit interior, this Gold Edition ARF does the original proud. It's your turn to be a scale ace...Top Flite makes it easy!

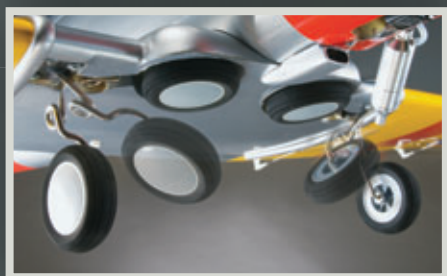

Fast ARF assembly, using the finest materials and engineering.

Gold Edition quality distinguishes this model from all other ARFs. In addition to the factory-built and covered wood main sections, Top Flite includes realistic wheel covers, replica radial engine, greenhouse canopy and other scale parts.

Impressive in itself, the greenhouse canopy surrounds a wealth of intricate cockpit detail — including instrument panels with dials and other details; painted pilot and co-pilot busts; and a rollover bar between them.

For the ultimate scale experience, Top Flite includes durable, well-engineered mechanical retracts that give inexperienced low-wing pilots the extra strength needed to withstand an occasional unpolished landing.

TOPA0965

- Wingspan: 69 in (1755 mm)
- Wing Area: 730 in² (47.1 dm²)
- Weight: 8.5-9.5 lb (3.85-4.31 kg)
- Wing Loading: 27-30 oz/ft² (82-91 g/dm²)
- Length: 51 in (1295 mm)
- Requires: 6-channel radio w/8 servos & 2-stroke .61 (10 cc) or 4-stroke .70-.91 (11.5-15 cc) engine

- ✓ Assembles in 18-25 hours.
- ✓ Constructed of built-up and sheeted wood, with fiberglass cowl and aluminum spinner.
- ✓ Forgiving airfoil and operational flaps ease the transition into scale warbird flight maneuvers.
- ✓ Realistic highlights include sturdy retracts and wheel covers modeled after those on the full-size aircraft.

AT-6 TEXAN ARF

ALMOST-READY-TO-FLY .60-SIZE Warbird

Fly with the Greatest Generation

The historically accurate trim scheme featured on this Gold Edition ARF is a Navy version of the Texan known as the SNJ Harvard. Reproduced in expertly applied MonoKote® film, it stands out at high altitudes for easily tracking your model's orientation.

An ideal 2-stroke engine choice for the Gold Edition AT-6 Texan ARF is the 61FX from O.S.® Engines (OSMG0561).

Use the flaps to increase altitude faster at takeoff — or to reduce speed and decrease the distance needed for landing. Mechanical retractable landing gear offers solid support during touchdowns and boosts scale realism in flight.

Enjoy 4-stroke muscle and fuel economy by powering your Texan with the O.S. Surpass™ FS-91S II (OSMG0896).

The painted fiberglass cowl is topped off with an aluminum spinner and realistic replica radial engine. Easy-to-install fiberglass air intakes and exhaust stacks provide a head-turning touch of authentic WWII Texan detail.

RECOMMENDED ACCESSORIES

Please note: All recommendations were the best options available at the time of product release. Please check with your dealer for additional choices.

Futaba® 10C 10-Channel 2.4GHz Computer System

Pro-level features at a sport system price.

- Wide range of capabilities for anywhere the hobby takes you — airplanes, sailplanes and helis.
- Logic switches allow unprecedented customizing ability — activate functions simply by changing the position of select sticks or switches.
- Delivers cutting edge 2048 resolution with unrivaled FASST signal dependability.
- Offers digital set up accuracy and the convenience of an expandable 15-model memory.

FUTK9250

Futaba® S136G Retract Servo

FUTM0670

- Delivers strong performance, in a compact size for easy installation.

S9001 BB Standard Servo

FUTM0075

- Coreless motor for smooth, quick response — dual ball bearings for fast transit time.

FS-91 Surpass™ II 4-Stroke Engine

- Benefits include impressive fuel economy and scale-like sound.
- Sealed rear bearing and corrosion-resistant plating add durability for long life.

OSMG0896

61FX 2-Stroke Engine

- Easy to start and maintain, yet delivers 1.9 hp for powerful maneuvers.
- Remote high-speed needle valve offers horizontal and vertical mounting options for installation ease.
